

BarrierGuard 800

Temporary & Permanent Steel Barrier

With the help of a temporary barrier the work zone can be protected for the benefit of both workforce as well as road users. Used as a lane divider for traffic, BarrierGuard 800 allows for safe traffic separation. BarrierGuard 800 offers the most appropriate solution.

BarrierGuard 800 is a successfully MASH and EN 1317 tested barrier that combines various performance-levels into one basic product.

Advantages of the BarrierGuard 800:

- + Full-scale tested according MASH and EN 1317
- + Relatively low weight
- + Durable with low carbon footprint
- + QuickMount connectors
- + Maintenance free
- + For work zones and lane division
